Curt trailer wiring

Your question might be answered by sellers, manufacturers, or customers who bought this product. Please make sure that you are posting in the form of a question. Please enter a question. CURT custom wiring is made with some of the most sophisticated technology in the industry and is designed to install with ease, giving you a long-lasting electrical connection for your towing setup. If your vehicle is not equipped with wiring for towing a trailer, CURT custom wiring is the ideal solution. A custom wiring harness also called a T-connector is a simple, plug-and-play electrical device that plugs into your vehicle's electrical system and provides a standard trailer wiring connection. This is done using two or more vehicle-specific, OEM-compatible connectors to plug into the taillight assembly, eliminating the need for cutting, splicing and soldering during installation. Custom wiring harnesses are made vehicle-specific, and while they are not available for all vehicles, they do offer one of the fastest, easiest and most secure ways to wire a vehicle for towing. This particular harness provides a 7-way RV blade connector socket and is designed to be a custom wiring harness for certain years of the Ford Ranger see application info to verify fitment. It comes with all necessary wiring components to establish a reliable trailer wiring connection, as well as a dust cover to keep the connector clean when not in use. You have a picture in mind of your next destination -- maybe it's the boat landing at your favorite fishing spot, maybe it's a campsite that overlooks one of nature's masterpieces, or maybe it's the next big jobsite. However, turning that picture into a reality takes more than just daydreaming. It takes a solid connection and the right amount of power. CURT offers custom trailer hitches, electrical products and a complete line of towing accessories to get you there with confidence and enjoy every mile of the journey. A CURT custom trailer wiring harness is the easiest way to equip your vehicle with the proper electrical connection for towing a trailer. Our custom wiring offers simple, plug-and-play convenience with no cutting or splicing required, and provides a reliable connection for powering your trailer lights. Best of all, each CURT custom trailer wiring harness is made vehicle-specific for a unique make and model. This makes installation hassle-free and ensures optimal performance with your vehicle. CURT offers two types of custom trailer wiring: custom wiring harnesses and custom wiring connectors. Both are made for specific vehicles, and both require zero cutting or splicing. This simply requires access to the taillight wiring. A custom wiring connector uses a single plug to plug into a designated OEM socket on the vehicle. Not all vehicles are equipped with this socket, but it does make installing very easy. Each custom trailer wiring harness and connector is made for a specific make and model, featuring the necessary components to provide a standard trailer wiring output. Whatever your lifestyle, choosing the right CURT custom trailer wiring harness for your vehicle is easy. Simply use your vehicle's year, make, model and style. The high-quality components used in our custom trailer wiring create very little resistance to reduce heat, limit voltage drop and extend the life of the circuits. SMT is manufactured with automated processes for maximum consistency and the highly efficient circuitry promotes optimum intensity and life for the trailer light. Surface mount technology is able to better withstand shaking and vibrations, conditions that are common while towing, compared to traditional through-hole-mount tech.

I had a bit of trouble hooking it up, but this is due to where the vehicle's connectors are located. Long flat screw driver was needed to help undo the connector and long nose pliers were needed to get it all to click back together. But once done, it works very well and has built in short protection as well. Very happy once it was all done. One person found this helpful. Easy-to-understand instructions. Easy install. Works perfectly. One thing to add: If you are installing this on a Sienna, consider this step that isn't found in the instructions. If you want your 4 pin plug near your receiver without having to close the rear door on the cable, there is a rubber plug mine was towards the left side that is just big enough for the 4 pin plug. I removed the plug with a flathead screwdriver, cut a. If you want to get fancy you can purchase an aftermarket socket that can be mounted near the receiver, or purchase a receiver that is fabricated with the socket. I just installed the rubber protector included and pushed the 4 pin plug through the hole on the side of the receiver and let it dangle. They even have a video of the adapter being installed in the same model vehicle Toyota Sienna that made the installation quite clear and easy. Easy installation, as long as you are handy with removing trim. Instructions were not complete in this regard. Wire lengths were just right. For my '98 Sienna, I did as another reviewer suggested, and passed my connector through the hole with the rubber plug, and cut a slit in the plug to slide the wires into. Hooked right up to my 99 Toyota Sienna and worked the first time without any issues. Installation was fairly simple following the enclosed instructions and took me about an hour without any previous auto wiring experience. Removing interior body panels in the van to tap into the existing headlight wiring was the most challanging part. After actually finding them, the Curt wiring harnesses clipped right into the existing wires. My only complaint is that the instructions could be more detailed and have better illustrations. The hand drawn diagrams were of poor resolution and sometimes difficult to interpret. Overall I'm very satisfied and I would definitely buy one of these agin. After installing a hitch myself, I needed a wiring to be able to tow a trailer. Amazaon had the best deal on this wiring harness kit, and some online videos convinced me that I could install it myself. I purchased the Neiko 5 pc. The installation went smoothly took me a little less than an hour. The only snag I ran into was the passenger side connection, which was hard to reach and manipulate. I highly recommend this kit because it's well-built, functions perfectly, and is easy to install. Easy to install, and very good quality. Vague instructions. Short zip ties. This was a perfect fit for my Toyota Sienna and works well. The zip-ties are not long enough to use. The installation is clear enough for your average tinkerer but not for someone who might be scared about popping off interior panels. See all reviews. Top reviews from other countries. Toyota sienna plug and. Report abuse. Works great easy install. It was an easy to install but I recommend that you get tool take off the inside covers. Pages with related products. Please make sure that you are posting in the form of a question. Please enter a question. There are several different types of connectors used to supply power from a tow vehicle's electrical system to a trailer's wiring system. Some trailers only need the bare essentials — running lights, brake lights and turn signals — while others require a connection for reverse lights, electric brakes and auxiliary power. With connectors ranging from simple to complex, it may be the case that the connection between your vehicle and your trailer is not a perfect match. For example, your truck may be equipped with a 6-way round socket, but your trailer may have a 4-way flat plug. For this very common problem, CURT offers a quick and simple solution in the form of an electrical adapter. An adapter is an electrical device that allows a connection to be made between a mismatched trailer plug and vehicle socket. It easily plugs in your vehicle's electrical socket and usually requires no additional wiring. CURT offers an array of adapters to accommodate most types of plugs and sockets, including 4-way flat, 4-way round, 5-way flat, 6-way round, 7-way RV blades and more. This special trailer light adapter is designed to plug into an existing 7-way RV blade socket to allow the vehicle to recognize LED trailer lights. It features built-in

resistors for vehicles with computers that don't recognize LED lights and enables them to be compatible with trailers that have them. It is not intended to be used as a wiring extension. All CURT wiring and electrical products come with a one-year limited warranty to give you the assurance you need to tow with confidence. CURT offers custom trailer hitches, electrical products and a complete line of towing accessories to get you there with confidence and enjoy every mile of the journey. CURT offers a complete line of towing accessories to let you fully enjoy your passion! With everything from custom trailer hitches and trailer wiring to 5th wheel hitches and cargo carriers, we have the towing equipment you need to make the most of each adventure. Whether you're working, playing or doing a little of both, CURT towing products enable you and your crew to make memories that will last a lifetime. A trailer hitch receiver is the starting point for most people looking to tow with their vehicle. CURT offers over 1, different custom hitch models to provide a perfect, factory-like fit on most vehicles on the road today. Our custom hitches provide a standard hitch receiver to mount a variety of towing accessories. The next step in equipping your vehicle for towing is to add a trailer wiring harness. Like our hitches, CURT custom wiring is made vehicle-specific for each make and model. Virtually all of our custom vehicle-trailer wiring harnesses install using existing factory connectors on the vehicle for a plug-and-play connection. No splicing necessary! With a custom trailer hitch receiver installed on your vehicle, a variety of ball mount options can be installed as needed. We offer loaded ball mounts with a trailer ball already torqued in place, as well as adjustable ball mounts, multi-ball mounts, tow hooks and more. A ball mount can be secured into the receiver using one of our hitch pins or hitch locks. To add cargo space to your vehicle, CURT offers a number of cargo management accessories. Our cargo carriers are available in a convenient, use-as-needed hitch-mounted design, as well as a roof rack option. We also offer bike racks, cargo bags, cargo nets and ratchet straps for additional item security. For heavy-duty towing of an RV or travel trailer with your pickup truck, CURT has a wide array of 5th wheel hitch options. To install a 5th wheel hitch in your pickup truck bed, CURT offers traditional 5th wheel rails and brackets, as well as puck system options and gooseneck adapters. For towing heavy-duty trailers around the farm or out to the construction site, CURT gooseneck hitches are a highly dependable extension of your truck. We offer puck system gooseneck hitch kits to accommodate trucks with the factory towing prep package. We also offer original-equipment-style gooseneck hitches for select applications, as well as traditional gooseneck hitches and brackets, such as our original Double Lock. CURT offers several different electrical trailer brake controller options to perfectly suit your towing setup and lifestyle. Our Echo mobile trailer brake controller is particularly unique, featuring a Bluetooth connection that links to your smartphone and provides highly responsive braking with your Apple or Android device as the interface. It easily plugs in with no tools or extra wires needed. We also offer our factory-like Spectrum and traditional TriFlex. To give your vehicle greater capability for towing a variety of trailers, CURT adjustable trailer hitch ball mounts provide the answer. This versatile ball hitch comes in standard hitch receiver sizes and provides flexible vertical adjustment to ensure level towing, even with large, lifted trucks and SUVs. Give yourself more control over your vehicle and trailer with a CURT weight distribution hitch. This receiver hitch attachment helps level the vehicle-trailer combination for a smoother ride. Our TruTrack weight distribution hitch is particularly unique, featuring integrated trailer sway control. These heavy-duty hitches are perfect for agriculture, construction and military towing. We offer pintle hitches, pintle hooks, ball and pintle hitch combinations, as well as channel-mount pintle hitches for an adjustable option. We also carry high-strength lunette rings for a solid connection to the trailer. Keep your cargo fully secure in your truck bed or trailer with a set of CURT ratchet straps. These cargo tie-down straps come with heavy-duty ratcheting mechanisms and are available in wide variety of capacities, lengths, hook types and colors. Skip to main content. I didn't understand why the lights on my new Carson trailer wouldn't work. The trailer dealer had no clue and just made my sign a waiver of acceptance before I drove off the lot. I did a little research and found out the trailer lights are LED and that most German vehicles detect the low voltage as an error and don't send power through the trailer connection. This device worked exactly as promised. Too bad Carson trailer doesn't care enough to do the same research so they can sell these to owners of certain model years of Mercedes , Porsche, Volkswagon and Audi. I needed this device to allow my factory trailer wiring to function properly with the led lights in a newer travel trailer. I also purchased the Curt Bluetooth trailer brake controller through another website that worked seamlessly with this adapter to control all lights and the electric brakes without having to install a brake controller. Highly recommend both devices. After doing this my Expedition instrument panel kept saying the trailer was disconnected when it wasn't. I added this adapter and it all works great now! Lights work good and no more error message. One person found this helpful. For whatever reason our mercedes wouldn't turn on or recognize our jayco jayflight led lights. Even our mercedes dealer and rv dealer were clueless to the fix. Finally after tons of reasearch I found this item. Works like a charm and does not drag. After electrical repairs on my ML taillights, I was having a big issue with camper lights not functioning. This involved months of frustration where the lights would operate one week, but not the next part of it was a faulty SAM module. One of the mechanics finally asked if the camper had LED lights, which it does, then recommended an adapter. Apparently there is an issue with some German cars and LED trailer lights. We've used this adapter since and have had no more issues. Even when towing in heavy rain. In fact, it even worked when the taillights weren't functioning properly bad module. Instantly solved the problems with LED tail lights on a popup camper being towed with a Tesla. The first one we ordered was wired totally wrong so did not work See all reviews. Top reviews from other countries. My Audi Q7 7 pin powered the lights on my trailer not LED lights on trailer but would not pair with a wireless brake controller. Plugged this in and it solved the problem instantly. I was worried that it would be too long, but it's not an issue and seems to be well connected. Towing with it in a couple of days so will update if any issues. Did not work on GMC Pages with related prod
