# Fuse blocks for boats

Best Practices and ABYC standards state that every positive wire on the boat outside the engine starting circuit must have circuit protection. When excessive current flows in an electrical circuit, wire insulation can melt and possibly start a fire. Circuit breakers and fuses protect the wire in electrical circuits. Blue Sea Systems extensive selection of circuit breakers, fuses, fuse holders, and fuse blocks gives boaters a range of choices for main and branch circuit protection. To help select the right size wire and proper fuse or circuit breaker, Blue Sea Systems offers our Circuit Wizard. The demand for ignition protected circuit protection has increased. Blue Sea Systems Safety and SafetyHub Fuse Blocks are specifically designed for use in environments with explosive fumes, such as an engine room or fuel storage locker. When excessive current flows in an electrical circuit, wire insulation can melt and possibly start a fire Circuit breakers and fuses protect the wire in electrical circuits. To help select the right size wire and proper fuse or circuit breaker, Blue Sea Systems offers our Circuit Wizard The demand for ignition protected circuit protection has increased. Loved everything about it. Perfect solution for rewiring an old small boat during restoration. Perfect for rewiring a boat! A neat installation for my additional boat wiring. Part was great for application in my boat very happy like the fuse blown indicator on each fuse. Worked well for a boat restoration. Perfect replacement fuse block for my crabbing boat. Good quality made product wAs installed easy into my boat. Worked great for my 87 Bayliner Cobra! Alot better than the old tube fuses. The fuse block has the several circuits and grounding lug that I was looking for to install in my boat. I like the grounding lug option because common ground doesn't work to well in a boat, and I will now have solid circuits for my boat electronics. Great for an old boat rewiring. Perfect solution for all my boat devices. Worked perfect for boat electronics. Is real strong and firmly. Very good unit to put in your Boat!!! The hardware is stainless and that is a must in a Boat!! Simple hook up, works great. It gets wet on the boat all the time, I haven't had a problem with mine. Not waterproof in a submersible way but has a somewhat sealed cover Very good quality product. Works Good on boat! Added circuit for boat, works good. No, its splash and water resistant. It should outlast your boat if placed in a fairly dry spot. I definitely feel it was. It is well made and provides good electrical protection for my boat. Good product ,just what i needed for my boat. Looks great, only time will tell how it holds up on a boat. Nice little fuse box, fit perfect under the dash of my boat. Just what I needed for my old boat to easily fuse and distribute my electrical connections. Great item for boat an good price. I don't believe its water PROOF it has a cover but it's not sealed I mounted it under the dash on a boat out of the weather and have not had any issues. Mine is in a 12 volt system on my boat. I connected it with 12 gauge auto wire. Most of my connections are low voltage items and so far I've not had any issues. Someone else might have a different opinion. Really nice for my boat. Used to modify power center on my pontoon boat and works perfectly. So nice when I'm out marina in the middle the ocean and a

fuse blows and I don't know which one it is well guess what the problem is over new fuse box that lights up and shows me which fuses out nice invention looks good my boat to Arima for life. Seems to be a good fuze panel the fuzes are pretty much waterproof unless submerged but definitely keeps salt spray off the fuzes on my boat arrived on time. Great for after market accessories for boat. It works perfect on boat for my lights and things. The unit was easy to install and wire into the boat systems we were wanting to control. Makes it easy to add circuits to an old boat. Perfect modification for my boat. Was thinking about getting a breaker box for my small sail boat. Skip to main content Explore fuse blocks for boats. Reviewed on Jan 9, Customer review. Top quality These made installing my new gauges on my f easy as pie! If you are like me and have never used one of these before you may end up spending 2 hours trying to figure out why you instrument cluster stopped working ha ha ha! New fuze goes in top slot black arrow and old one goes in bottom slot blue arrow I feel a little silly to be. Great price and very handy to have in the shop. Great price and handy. It is nice to have spares in the shop. I just needed a couple for LED driving lights. The spares are a plus and I will be ordering more since friends are talking me out of them. They will now go in my roll-away and not on my personal parts wall. Quality for cheap! Bought this to replace an old glass fuse box on my boat! This is perfect! I am impressed with the quality and the amount of features and stuff you get with this! I love the stickers and the blown fuse led feature! Just perfect! Price is also. Next page. n done, you need the terminal blocks on our list. When it comes to terminal blocking, planning goes a long way. Set yourself up for success with the best terminal block wiring tools to make the job easier and faster for you. The best fuse blocks. A fuse block contains anywhere from two to 12 fuse circuits, which can be independent so each circuit has its own individual input and output wires and shares power with other circuits. Also known as a fuse panel, a fuse block is designed to keep voltage spikes and short circuits from damaging wiring and electrical system parts. They are typically used in power distribution systems. The Best Fuse Blocks. While it may be fun to watch a recently finished project burn to the ground, blowing a fuse is
