Image of dodge nitro

Used Dodge Nitro for Sale 4. Overall Rating. Track Price Check Availability. By Rating. Overall 5. I loved everything about my vehicle. I would still have it if my husband hadn't totaled it. I loved the way it looked, inside and out. It was an SUV but not too small or too big. I had plenty of space inside of it. The back had plenty of storage space. Going grocery shopping was so easy with this vehicle. I just opened up the back hatch and put everything inside. It had a nice flat area to set everything on so nothing turned over. The vehicle ran well. It had 4-wheel drive and did awesome in the snow, ice and mud. It went anywhere we needed it to go. I owned the my nitro for several years and never had any major problems out of it. We like to go camping and this SUV makes it super easy to bring along all of the things you may need to camp. It was always nice to lift up the hatch for a place to sit and crank up the music and sit around the camp fire. The 4-wheel drive was my favorite thing about my nitro. Now that I have a vehicle that doesn't have that feature, I really miss it and realize how valuable it was. The storage space behind the back seats is another thing I really miss. It was so easy to haul rather large items or even just pick up groceries with the amount of storage that it had. The only negative thing I can think of with this vehicle has to do with the plastic on the outside of it. Most of the plastic had faded to a grey color and seemed to come loose easily. That is my only complaint. The overall look of the exterior is sporty without being too aggressive. Once you get into the driver's seat the Nitro seems to wrap around you like a cockpit. Even the back seats are comfortable and inviting. I fell in love with the Nitro 2 years before I bought one. Our first camping trip with our Nitro gained us some very jealous looks from the other campers in our group. While everyone else was using manual pump to inflate their air mattresses we simple ran an extension cable from the Nitro into our tent and plugged it into the outlet in the backseat and used our electric air pump. Our air mattress was inflated and ready to go in minutes! The built in power inverter is an a great feature! It has better gas mileage that other comparable models. The backseats have a few inches of reclining which can make a huge difference. I also love that they fold completely flat when they need to. The small storage space under the cargo area is a great feature as well. There is an amazing amount of room for everything from camping equipment, home improvement supplies, pets, and anything else you want or need to move. The passenger foot area has a strange slat on the left side that can make it a little uncomfortable after a few hours of ridding in the car. I was looking for a truck but found this little guy in my price range instead. It is awesome, and I have only wished it were a truck when I wen to pick up gravel! It has the pep of a car and the durability of a truck. I did switch out the stock tires for a more aggressive four-wheel drive tires. I love my '07 Dodge Nitro. Hauled a bunch of lumber, and the guy at the store kept telling me I was going to have to come back with a truck. I folded the seats down and loaded it all up. He was amazed, and the look on his face was priceless! Front passenger seat folds flat and can put something that is 8 feet in length in the cab. Tow package can handle 5, pounds and does a great job towing over the mountains. It has a plug in in the back seat and a car plug in in the front as well as the very back. There is a hidden cubby in the cargo area that is perfect for holding tools and jumper cables. Love that it comes with an auxiliary output as well as Bluetooth. The design of the rear windows internal components is bad. It has plastic pulleys running a wire rope, which will eventually shear through the pulley. The tires that come stock on this are for city driving, but the vehicle is a four-wheel drive. Some of the parts are only available through Dodge, and it requires the Mopar antifreeze, or it overheats. For a small v6, you would think it would get better gas mileage, but it gets about in town. Dodge is no longer manufacturing the Nitro, which is sad because you can never get a new one. They could have fixed many of the flaws and had the They could have fixed many of the flaws and had these babies on the road for years to come. Used Dodge Nitro. EN Carrollton, Kentucky Overall. The upcoming mid-size model is offering seats for five and is available with two V6 engines. Also, this crossover comes with a rear drive system as the standard, while the

all-wheel-drive system is optional. It offers a unique look and is equipped with massive inch wheels. The Dodge Nitro model will come with bold, upright exterior design. From the images that we get, the upcoming model will keep its old retro look followed with more sharper lines. The whole body looks attractive and the new model will feature clamshell-style hood, color-keyed crosshair grille, and decorative side vents. This crossover SUV rides on a new stylish inch polished aluminum wheels surrounded by all-season tires. The headlight, taillight as the fog lamp will use the same LED technology. Furthermore, we can expect more color options for the final product. The Dodge Nitro will offer spacious cabin and updated techs. With the two rows, this model is able to accommodate five passengers. It also provides roomy cargo space. However, for maximum cargo hauling, there is an available flat-folding front passenger seat. Furthermore, the rear seat will get generous legroom and headroom. Folding down the rear seats, the buyers will get huge storage behind. Moreover, tech inside is also better than in the predecessor. Safety will be also better, and we can expect electronic stability control, lane assist, plenty of airbags and child lock. The Dodge Nitro will keep under the hood the same aging engines. So, we can expect two V6 options that will come with better output and fuel economy. However, exact numbers are not available at this moment. The current model comes with the base engine of 3. The next one that is available in the higher trims is a 4. This engine makes horsepower and lb. Furthermore, both engines are available with a rear wheel drive system or a full-time four-wheel drive. So, with the new model, we can expect some output boost. More information will be available soon. The release date of the forthcoming Dodge Nitro crossover will happen sometime next year. The rumors about the Dodge Avenger are still present. Reportedly, this model will arrive â€¦. Your email address will not be published. Notify me of follow-up comments by email. 2008 dodge charger repair manual

, we can expect basic stuff. The safety rating is good thanks to the numerous standard and optional features. A system such as a lane keeping assist, stability control, and blind spot monitoring are all in the offer. Of course, leather upholstery and heated and ventilated seats are optional. Back in the days, Nitro SUV was offering the best-in-class tow rating. Now, things will drastically change. Whatsoever, we still hope for Dodge to deliver an astonishing turbocharged engine. On the other hand, a 3. This engine is producing hp and lb-ft of torque. A larger 4. If it arrives, this engine will be an optional choice. It can generate horsepower and lb-ft of torque. Both engines will offer a standard rear-wheel-drive system. Optionally, you can buy a full-time four-wheel-drive setup. A 6-speed automatic transmission is the most likely outcome. The prices are in line with the rest of the competition. This mid-size crossover SUV will go on sale in the last quarter of Leave this field empty.
